Networks Lab 9

Q1. Implement different topologies in Cisco Packet Tracer.

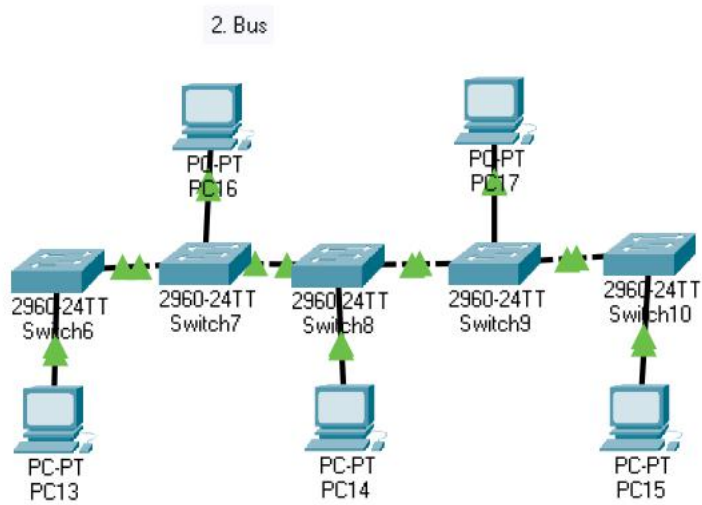

Steps:

- 1. We start by setting up the IP addresses of the PCs in the network followed by subnet mask, which automatically gets set.**
- 2. Then we use automatic connection cables to do connections in between the devices in the network.**
- 3. We also used Switches or Hubs where ever needed to do appropriate way of connection.**

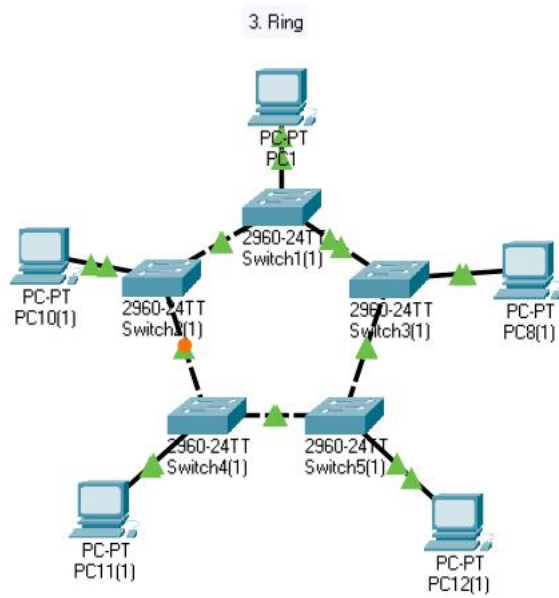

1. Point to Point

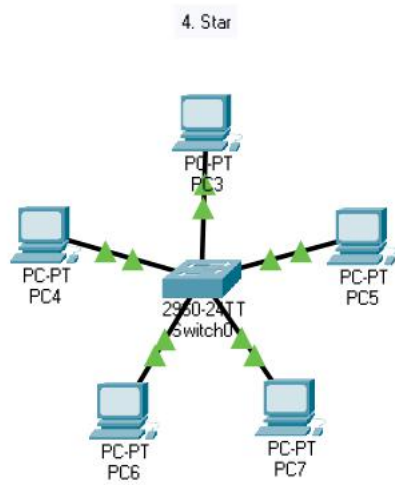

2. Bus Topology

3. Ring Topology

4. Star Topology

5. Mesh Topology
